Work sheet: How to create a LEGO freeze frame

① Scene selection

- brainstorm which scenes you have read were most important to you
- Summarize the scene in 2-3 sentences. Why did you choose this scene?

② Scene breakdown

Identify the key elements by answering the questions below.

Who is involved?

Where does it take place?

What is happening?

③ Planning the LEGO model

What bricks do you need? Write them down below. Think about the different characters, the setting and certain actions in the scene and how they could be portrayed in a freeze frame.

④ Building the LEGO scene

- try different arrangements, pay attention to the extra tips at the bottom
- Write down the aspects of your freeze frame or take a picture of it.

⑤ Prepare the presentation

How do you want to present your LEGO freeze frame? Write some notes down below. You could also use the questions from the „How to“-poster.

Extra tips

- use colors for symbolism: certain colors are associated with specific emotions (e.g. red for anger, blue for sadness, ...)
- action poses: use dynamic poses to show movement or emotion (e.g. a figure with a raised arm/fist might show anger)
- add simple background pieces to show the setting more clearly (e.g. a tree for outdoors, a table for indoors, ...)
