

## Versteckte In-Sätzchen 2

 **Beispiel:**

$$5 \times 3 + 2 = 17$$

$$5 \times 8 + 2 = 42$$

$x 0 +$  – 52

①

$$x 3 + \square = 17$$

$$\square x 7 + \square = 31$$

$$x 8 + \square = 42$$

$$\square x 4 + \square = 20$$

$$x 6 + \square = 38$$

$$\square x 5 + \square = 28$$

$$x 3 + \square = 6$$

$$\square x 9 + \square = 59$$

$$x 6 + \square = 36$$

$$x 4 + \square = 14$$

$$x 2 + \square = 9$$

○

②

$$x 2 + \square = 12$$

$$\square x 2 + \square = 21$$

$$\square x 5 + \square = 29$$

$$x 9 + \square = 86$$

$$\square x 2 + \square = 16$$

$$\square x 8 + \square = 78$$

$$x 4 + \square = 29$$

$$\square x 7 + \square = 35$$

$$\square x 7 + \square = 44$$

$$x 8 + \square = 26$$

$$\square x 4 + \square = 29$$

$$\square x 4 + \square = 13$$

○

③

$$x 6 + \square = 24$$

$$\square x 6 + \square = 23$$

$$\square x 7 + \square = 27$$

$$x 9 + \square = 53$$

$$\square x 9 + \square = 18$$

$$\square x 6 + \square = 41$$

$$x 2 + \square = 17$$

$$\square x 6 + \square = 10$$

$$\square x 3 + \square = 19$$

$$x 7 + \square = 16$$

$$\square x 3 + \square = 17$$

$$\square x 4 + \square = 14$$

④

$$x 3 + \square = 21$$

$$\square x 6 + \square = 29$$

$$\square x 8 + \square = 44$$

$$x 8 + \square = 58$$

$$\square x 8 + \square = 71$$

$$\square x 9 + \square = 12$$

$$x 7 + \square = 22$$

$$\square x 3 + \square = 17$$

$$\square x 3 + \square = 27$$

$$x 3 + \square = 5$$

$$\square x 4 + \square = 31$$

$$\square x 9 + \square = 44$$
