National Parks - so much to discover!

Crater Lake National Park is located in southern Oregon, USA. It is home to one of the most breathtaking natural wonders in the country: Crater Lake. Crater Lake was formed around 7,700 years ago when a volcano collapsed, creating the stunning Crater Lake we see today. Crater Lake is known for its deep blue waters. It is the deepest lake in the US and is surrounded by cliffs.

The most popular activity is hiking. In summer, you can go swimming. In winter, the park transforms into a winter wonderland. You can enjoy skiing and a snowy landscape.

The park is also home to wildlife, for example black bears, deer and eagles.

In conclusion, the park offers an unforgettable experience.

National Parks - so much to discover!

The Olympic National Park is located in the state of Washington. It covers nearly 1,000,000 acres and consists of three regions: the rugged mountains, the lush rainforests, and the stunning coast.

The highest peak is Mount Olympus.

The park is a haven for nature lovers, where you find hiking trails, beautiful scenery and crystal-clear lakes.

You can find different wildlife as well, such as elks, black bears and different birds. It is the largest wilderness area in Washington and is a designated World Heritage Site by UNESCO.

In conclusion, Olympic National Park has something for everyone.
