Cleaner Oceans, Healthier Planet - Plastic Pollution

Task: Listen to the TED-Ed lesson "What really happens to the plastic you throw away" by Emma Bryce. While you listen, answer the questions. You will hear the audio twice.

1	What is the audio about?
2	What does plastic consist of?
3	Why are landfills (=Mülldeponien) problematic?
4	How many years does it take for a plastic bottle to decompose?
(5)	Where does the second bottle end up?
6	How does plastic waste impact marine life in the ocean?
7	In what way are we humans affected by ocean pollution?
8	What is the smallest unit of plastic mentioned?
9	What happens to the third plastic bottle?
