

Name: Saving the Environment - Cleaner Oceans, Healthier planet (Plastic pollution)

Cleaner Oceans, Healthier Planet - Plastic Pollution

Task: Listen to the TED-Ed lesson „What really happens to the plastic you throw away“ by Emma Bryce. While you listen, answer the questions. You will hear the audio twice.

① What is the audio about?

② What does plastic consist of?

③ Why are landfills (=Mülldeponien) problematic?

④ How many years does it take for a plastic bottle to decompose?

⑤ Where does the second bottle end up?

⑥ How does plastic waste impact marine life in the ocean?

⑦ In what way are we humans affected by ocean pollution?

⑧ What is the smallest unit of plastic mentioned?

⑨ What happens to the third plastic bottle?
